This month again sees a year-on-year increase (3.8% Excl Transit) in passenger numbers which isn't as good as last month, but at least it is an increase. The freight figures actually showed a decrease of -6.3%, which is probably a cause for concern at the airport. Both domestic and charter passengers reduced, which didn't help the overall figures. Interestingly for the 4th month in a row Terminal 3 had more passengers than Terminal 2. This probably has now become the norm in the winter months as previously this occurred only rarely and only in the winter months.
