March 2021 figures should be taken in the context that a significant decline in passenger numbers had already taken place in March 2020 with a reduction when compared to March 2019 on 54%. Therefore a reduction of 81.7% for passengers compared to March 2020 is more like a 90% reduction compared to a 'Normal' March. However, we should start to see improvements when compared to April 2020 onwards
